INNERVE SUMMER OF CODE - Day-to-Day Task List

Participant Name: Soumyajoy Das

[Forked Repository](#)   [Hosting Repository](#)   [Website](#)

1. Day-1(3rd November): I've forked the WebDev2021 repository from the ISOC Github account and developed the basic structure of the home page which includes the navigation bar, header, and footer on the index.html page.

2. Day-2(4th November): Used the given color palette to decide the theme of the Webpage and developed the basic style.css page and selected font for the web page.

3. Day-3(5th November): Developed the basic Log-in frame for the students and admin's login page.

4. Day-4(6th November): Could not contribute anything because of sickness.

5. Day-5(7th November): Added forgot password page for the Log-in pages for students and admins.

6. Day-6(8th November): Changed the CSS for index.html to add CSS Animation in the index.html page.

7. Day-7(9th November): Added Bulletin, Society News, and Updates marquee on the home page and added buttons. Also made the website responsive.

8. Day-8(10th November): Started working on Courses Page and added Javascript feature for the courses page button to expand and show details regarding each Course.

9. Day-9(11th November): Separated CSS for different types of pages to debug the Website. Also added the events section with the same JavaScript feature as the Courses page and modified the Javascript code to Change Button Text when pressed.

10. Day-10(12th November): Added Pages for Bulletin and Society News Buttons and added Google map section in the index.html page showing the location of IGDTUW and also added the Schedule Page. Finally, I've pushed the code in the Innerve Repository and hosted it on Github Pages.
